* Battery prices are estimates based on data gathered from a variety of internet sources that sell batteries for these popular brands. You may spend more or less depending on which replacement schedule you follow and where you buy the batteries. We assume a dog's life span to be 12 years. Visit "The Battery Factor" at www.DerbysFence.com for additional detail on battery costs.

** Do it Yourself is based on the popular PetSafe model - which is carried by a number of local stores.

Features & services based on available information from the corporate websites.
